## December 2022

#NEVERMIND is a FRRB granted project coordinated by IRCCS Fondazione Don Carlo Gnocchi to develop **engineered nanovectors** to ameliorate the efficacy of drugs for neurodegenerative diseases and brain cancer.

## NANOMEDICINES AS NEW STRATEGY FOR THE TREATMENT OF GLIOBLASTOMA

The application of nanomedicine to neurological diseases has emerged as a therapeutic strategy for glioblastoma. An Italian research group synthesized polymeric nanoparticles decorated with different ligands to compare their ability to cross the blood-brain barrier and reach the tumor site. [Read more](#)

## A HOPE AGAINST ALZHEIMER'S DISEASE

A group of researchers from Yale University published a clinical trial, describing the experimentation of a new drug that would slow cognitive decline in Alzheimer's patients. [Read more](#)

## News

### MERRY CHRISTMAS!

The NEVERMIND consortium wishes you all

Merry Christmas and a happy New Year!!

### NEUROSCIENCE NETWORK

Researchers of Fondazione Don Gnocchi have taken part at the

[II Annual Meeting of IRCCS Networks about Neurosciences and NeuroRehabilitation!](#)
